

# Release information to Raptool Partners and Distributors

## We are happy to officially release four new Raptool Clients

### The following Raptool Clients are now available:

- Android. Any version above 4.0
- Android Watch (limited functionality)
- iOS. iPhone and iPad. (Currently iOS 9 is not working. Estimated release fix is 1:st of October)
- Windows Phone 8 or 10

### Adding to the already existing clients:

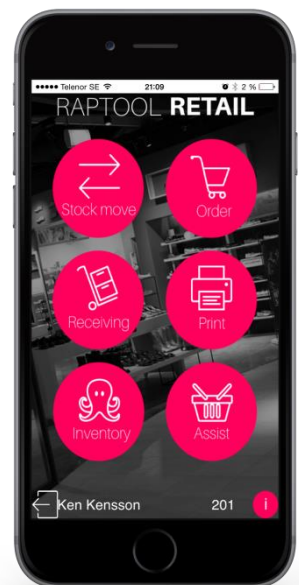

- Windows CE: CE 4.0 or newer. Most CE Core version will work.
- Windows Mobile.
- PC Windows: XP, Vista, 7, 8 or 10.

## Can I try it?

Sure you can! The Raptool Clients are already available in App-store, Play-store and Windows Store (ARM) today. Currently only Raptool Retail is in the Demo-account. More apps will be added all the time to help you sell Raptool to your customers. Download the Raptool app. Raptool Retail will load. Push: Demo. Login with user 1000 and push Enter. Enter access code: 1234 and push enter. Push for example order, enter 12 as an article number, push enter. Enter a quantity, push enter.

## Free Designer!

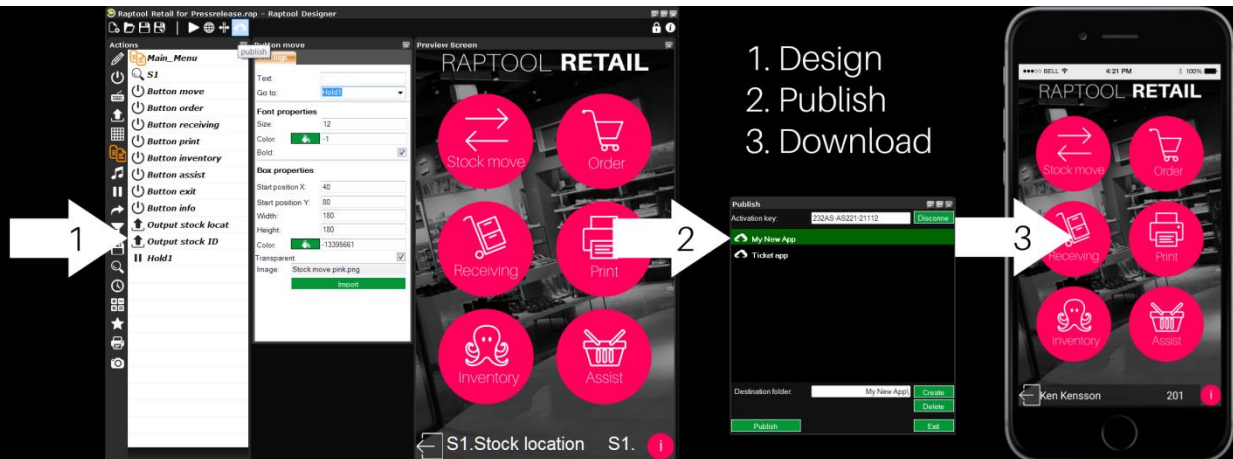

If you want the Raptool Designer, and make your own app you email: [order@raptool.com](mailto:order@raptool.com) to get the latest version.

# One-button publish

Release 3 contains a new "Publish"-feature:

1. Design your app
2. Push publish and enter your license serial number (delivered when you order)
3. Download the Raptool client and enter the same license serial number

## One Design, multi device.

Tablet, phone, kiosk, PC, industrial device? Yes, your Raptool App-design will run on them all. The app will auto-scale to fit the screen-resolution of the device it is running on. And no, it is not a web-page. It is a native app giving you that great app-feel and the option of working offline when you are outside the wireless coverage.

**ONE**  
APP-DESIGN

**ONE**  
INTEGRATION

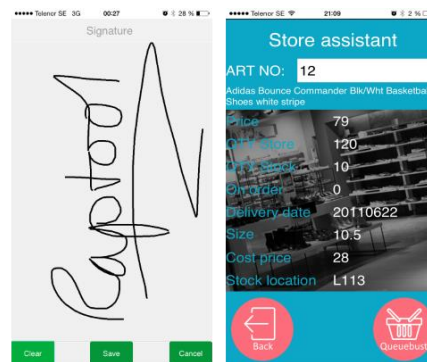

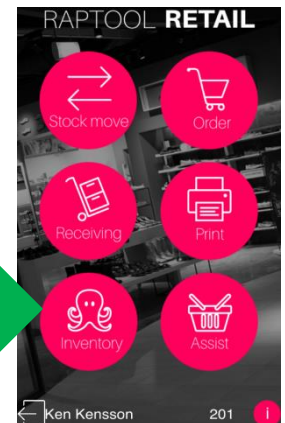

## Will my old Raptool-app run?

Yes, most old Raptool apps will run without change. Some communication options are different between the different versions. For example USB-Docking to transfer data to/from the mobile device is only available on Windows CE and Mobile. The rest need Wi-Fi, Ethernet or 3G/4G connection to communicate.

# Make your apps look great!

In Raptool 3 you can make your apps look sexy! Some of the new features are:

- Background image for each New Screen.
- Use an image as a button.
- Transparent background for: Buttons, input fields, output...
- Signature & image capture
- Camera barcode reading. Only for 5-10 barcodes a day, or you will go crazy. We still recommend REAL barcode scanning!

\*some features will not be available on all device types on release...

## Training?

We will do web-training sessions during the autumn. The first session will be on the 2:nd of October at 11:00 (Swedish time). We will use TeamViewer 9. Send your request to join to: [sales@raptool.com](mailto:sales@raptool.com).

## Windows 10?

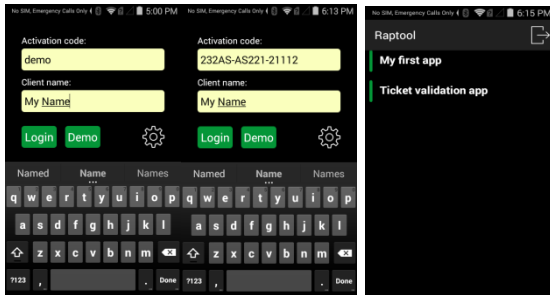

Windows 10 is now tested and approved for the Raptool PC-client, Raptool Designer and Raptool Communicator.

## Introduction Price!

With the new release we will offer hosted solutions. No installation, no servers. Just build your app and go! We will release a special price for Raptool Partners through your distributors. You will also get a CDS-Account to store your data in the cloud. We will still offer the same "pay once, run forever" solutions if you want to run your own Communicator and servers. The Demo-apps are always free (just push demo in the app). You can use these to demonstrate solutions to your customers. We will be adding new apps here every week.

## Get started with the Raptool Client

Push the Demo-button to use the app without a Raptool app-account. If you have an app-account, enter your Activation Code. The apps you have uploaded will be displayed. Select the app you want to run. When your app-design is running, pull down on the screen to show the exit-button.

Don't forget to check out our new website

Best Regards/Team Raptool
